

závěs a udržet v čase, je před námi ještě dlouhá cesta sledování kvality dat a ladění výkonnosti algoritmů s tím, jak se pacienti, intervence a kontext poskytování zdravotní péče dále vyvíjejí. Pokroky v monitorování DoA a integrace AI do anesteziologie zdůrazňují posun k personalizované, datově řízené péči o pacienta. Monitorování

DoA stále zlepšuje výsledky, zejména u zranitelných skupin, zatímco AI slibuje zvýšení efektivity rozhodování a řízení operačních procesů. Budoucí výzkum by se měl zaměřit na překonání technických a etických výzev, aby se naplno využil potenciál AI v anesteziologii [34].

PROHLÁŠENÍ AUTORŮ: Prohlášení o původnosti: Práce je původní a nebyla publikována ani není zasílána k recenznímu řízení do jiného média. **Střet zájmů:**

Autoři prohlašují, že nemají střet zájmů v souvislosti s tématem práce. **Financování:** Podpořeno MZ ČR – RVO VFN64165.
